## Introduction

This guide is provided to assist you in the installation and configuration of the Rapid Action Profits Multi-Download Add On.

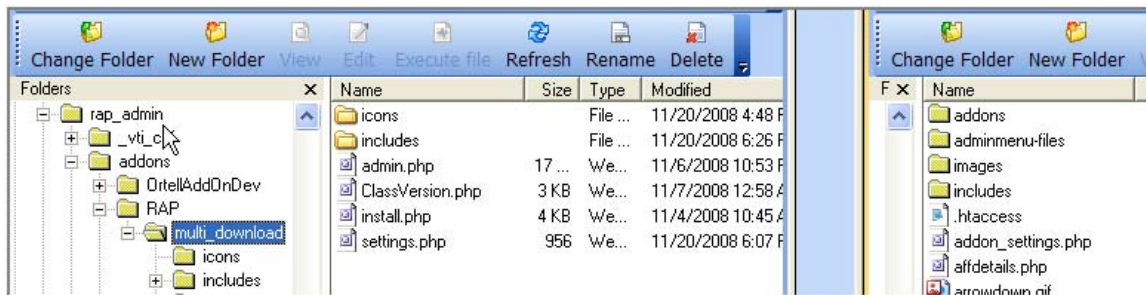

The Rapid Action Profits Multi-Download Add On is an extension of your Rapid Action Profits system and is licensed as a part of that product. It extends the core RAP product by removing the limit of one download for the front-end offer and one download link for the one-time offer.

The Multi-Download Add on allows for as many secured download links as you desire on any the download pages for both the front-end and on the one time offer.

## Installation Procedures

### Uploading the Add On to your Web Server

Since this product is distributed with your Rapid Action Profits system, it should be uploaded to your server automatically when you upload the Rapid Action Profits Admin files.

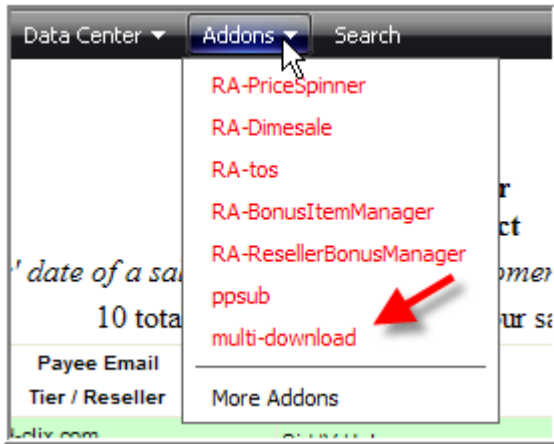

When you copy the rap\_admin folder (and all its contents) from your hard drive to your web server, the Multi-Download Add On files will be copied as well, because they are contained within the rap\_admin folder.

(i.e. rap\_admin/addons/RAP/multi\_downloads/)

Once the files have been loaded to the proper location on your server (this should have been done automatically during the installation/upgrade of your RAP system), simply log into your Admin panel at [http://YourDomain.com/rap\\_admin](http://YourDomain.com/rap_admin).

### Installing the Add On

After logging in and selecting a Product, hover your mouse over the “Addons” button. A drop-down list of add-ons will show, with “un-installed” addons in red and installed add-ons will show in black.

At this point, we have uploaded the Multi-Download Add On, but we haven't installed it (notice it shows above in red).

Simply click on the red link to "multi-download".

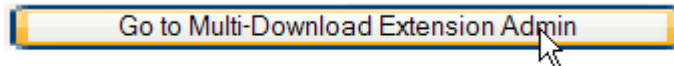

Various components of the Add On will be installed, including the addition of the necessary database tables that are added automatically to keep track of what files are to be linked on the RAP download pages.

## Configure the Add On for Each Product

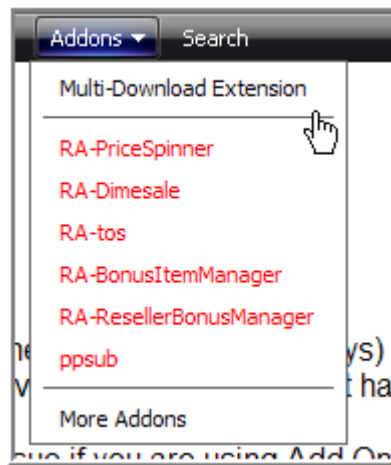

Next, we have to configure the Multi-Download Add On to specify what files are to be allowed for download for that product.

There are two ways to get to that:

1. Simply click on the button at the bottom of the page after the install, or

2. later, by clicking on the Add On from the drop-down box available under the Addons menu button (notice that the Add On is now separated from the un-installed Add Ons, and now shows in black text).

Either option will show you the Main Admin page for the Multi-Download Add On.

## Multi-Download Extension Admin

 Installed Version: 1.0.0    Current Release: 1.0.0    **You have the latest version.**

[Multi-Download Extension Support](#)

---

Configure Multi-Download Extension for **Your Test Product**

[Edit Downloads For Front End](#)    [Edit Downloads For Back End](#)

[Delete Add On For This Product](#)

Each time you come to this page, the Multi-Download Extension “phones home” to determine if you need to upgrade to a newer release, and will tell you immediately (in red) if there is a newer version of the Add On than your installed version.

This page also provides a support link to allow you to easily get to the Rapid Action Profits helpdesk if you need.

The buttons are self-explanatory. There are navigation buttons to allow you to begin editing downloads for the front-end offer, and for the back-end (one-time) offer, if there is one for this product. There is also a button to Delete the Add on for this product.

Clicking either “Edit” button brings up a page to let you define the location of the download folder, and some of the display characteristics of the download links. The location of the download folder can be relative to the location of the product folder, or it can be relative to the root folder of your web site.

## Multi-Download Extension Admin

---

Configure Multi-Download Extension for **Your Test Product**

**Edit Your Test Product Downloads**

**Download Location :**   
(from Product Setup)

**Width of Download Table**

**Row 1 Color**

**Row 2 Color**

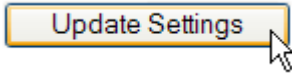

| File Name              | Size Selected |                                     |
|------------------------|---------------|-------------------------------------|
| <b>download.zip</b>    | 181.06 KB     | <input checked="" type="checkbox"/> |
| <b>otodownload.zip</b> | 1.01 KB       | <input type="checkbox"/>            |
| <b>RAPSystem.zip</b>   | 594.57 KB     | <input type="checkbox"/>            |

Assuming you previously did the “Product Set up” and specified the download location at that time, the single download file will be shown in this box, as it is taken directly from the product setup. Since you want to be able to specify multiple download files, you need to specify the download location as a folder name (followed by a slash).

This download location will be updated to the Product Setup.

To organize the download links, they will be shown to your customers after purchase in a nicely formatted table. You can specify the width of this table, and the hex value of two colors that will alternate to make a pleasing display.

Once you click on the Update Settings button,

the product set up will be changed, and the download folder will be read to create a list of files that can be downloaded from that location (all download files MUST be in the same folder).

Simply check the files you want delivered (in this case for the front-end purchase) and click on the “Update Settings” button again to record the files you want to allow downloaded for that purchase.

The Main Admin page for the Add On will be shown so that you can then maintain similar specifications for the one-time-offer downloads.

## Use of the Add On in Your Download Templates

There are no special requirements to use the multiple download links on the download pages that your customer will see after purchase.

The templates for those pages already have a tag that causes RAP to retrieve, display, and download the single download file. The RAP Multi-Download Add On simply interrupts the flow of the download pages to insert a table of multiple download links where necessary.
